

IRIS Data Release Report

The data release report summarizes a variety of metrics generated from our quality control and analysis workflows. All IRIS cases are processed through our WGTS (Whole Genome, Transcriptome) sequencing and analysis pipelines, and include a single tumour sample with a matched normal.

Project Code	Release	Date of Report Generation

Tissue Type: R: Reference or non-tumour, non-diseased tissue sample. P: Primary tumour M: Metastatic tumour

Tissue Origin: Pb: Peripheral Lg: Leg Ln: Lymph Lv: Liver Br: Breast Sk: Skin Nk: Neck Es: Esophagus Ly: Lymphocyte

Library Type: WG: Whole Genome WT: Whole Transcriptome

2. Genomic Structural Variants

Summary metrics for structural variants generated from the WG Tumour/Normal pairs. Calls are generated with delly.

Donor	SV Calls	SV PASS Calls	Translocations	Deletions	Duplications	Insertions	Inversions
IRIS_0005	87	76	12	41	12	0	11
IRIS_0002	196	172	17	116	25	0	14
IRIS_0001	314	295	12	167	79	0	37
IRIS_0029	135524	12578	331	117	46	0	12084
IRIS_0020	567	475	38	217	100	0	120
IRIS_0054	85437	493	176	65	11	0	241
IRIS_0035	688981	8128	625	74	29	0	7400

SV Calls: The number of somatic structural variant calls identified by delly

SV PASS Calls: The number of structural variant calls marked as PASS

Translocations: The number of PASS translocation calls

Deletions: The number of PASS deletion calls

Duplications: The number of PASS duplication calls

Insertions: The number of PASS insertions calls

Inversions: The number of PASS inversions calls

3. Mutations

Summary metrics for somatic mutations (snvs + indels) generated from the WG Tumour/Normal pairs. Calls are generated with mutect2, and annotated with variant effect predictor.

Donor	Calls	PASS Calls	SNPs	Indels	Ti/Tv Ratio
IRIS_0005	594949	11024	8101	2601	1.38
IRIS_0002	859685	33137	25169	6855	1.25
IRIS_0001	837500	39525	26452	12414	1.04
IRIS_0029	1306398	204994	167072	22869	2.42
IRIS_0020	928752	80384	68917	5614	1.56
IRIS_0054	4274203	265677	239908	9437	2.95
IRIS_0035	2675659	382922	271446	90642	2.02
IRIS_0004	829487	36133	31265	4435	0.83

Calls: Total number of calls identified by Mutect2
PASS Calls: Total number of PASS calls
SNPs: Number of SNP calls
Indels: Number of insertion/deletion calls
Ti/Tv Ratio: Ratio of transition vs transversion mutations

4. Gene Expression

Summary metrics for normalized expression (TPM, transcripts per million) for genes in gencode release 31 (https://www.gencodegenes.org/human/release_31.html). Expression values are generated with RSEM.

Donor	Total Reads	Percent Non-zero	0.05 Quantile	0.5 Quantile	0.95 Quantile
-------	-------------	------------------	---------------	--------------	---------------

Total Reads: Total number of reads assigned to a gene
Percent Non-zero: Percentage of non-zero read counts
0.05 Quantile: Expression at the 0.05 quantile
0.5 Quantile: Expression at the 0.5 quantile
0.95 Quantile: Expression at the 0.95 quantile

5. Gene Fusions

Summary metrics for identified gene fusions. Fusions are detected with STAR-fusion.

Donor	Fusion Calls
-------	--------------

Fusion Calls: Number of gene fusions identified by Starfusion
